

**Date:** 3/12/2007  
**Name of Product:** SelectSurvey.NET  
**Contact for more Information:** <http://www.classapps.com>

**Legend:**

Minor Exception: Usability research indicates that the exceptions noted are not significantly disruptive to product functionality. In some instances, this indicates that the functionality described is accessible through equivalent, alternative means, via the keyboard utilizing standard menu options.

## Section 1194.22 Web-based Internet information and applications – Detail

### Voluntary Product Accessibility Template™

<i>Criteria</i>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	All images in the application have alt text describing what the image is or what the image says, in the case of an image button.	All rendering by the Microsoft .NET Framework for 2.0 is 508 compliant.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not Applicable	There are no multimedia presentations included in the survey software.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Not Applicable	There is no color specific functionality in the software.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Pages are readable without a style sheet	Without a style sheet text will default to the size and font specified by the browser the customer is using.
(e) Redundant text links shall be provided for each active region of a server-side image map.	All image maps have redundant text links.	All rendering by the Microsoft .NET Framework for 2.0 is 508 compliant.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	All images in the application are client side images.	

(g) Row and column headers shall be identified for data tables.	All data tables have row and column headers that are text.	
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	All data tables have row and column headers that are text.	
(i) Frames shall be titled with text that facilitates frame identification and navigation	Not Applicable	Frames are not used in the application.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Pages are designed not to flicker in frequency greater than 2 Hz and lower than 55 Hz.	
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	All web pages use regular text, redundant text links and redundant text alt tags.	All rendering by the Microsoft .NET Framework for 2.0 is 508 compliant.
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	All dynamically displayed data has textual tags surrounding it for assistive technology readers. Survey questions and form items throughout the entire application contain <label for=..></label> tags that are designed to be read by Assistive Technology.	All rendering by the Microsoft .NET Framework for 2.0 is 508 compliant.
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	Not applicable	No applets or plugins are contained in the application.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	All dynamically displayed data has textual tags surrounding it for assistive technology readers. Survey questions and form items throughout the entire application contain <label for=..></label> tags that are designed to be read by Assistive	All rendering by the Microsoft .NET Framework for 2.0 is 508 compliant.

	Technology.	
(o) A method shall be provided that permits users to skip repetitive navigation links.	There are navigation buttons at the top of the pages to skip to other areas in the application.	
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not applicable	There are no timed responses in the application.

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.
