Section 1194.22 Web-based Intranet and Internet Information and Applications

- Applicable product(s): SelectSurvey.NET v5.000.000-v5.041.002 and greater.

Criteria	Level of Support	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via 'alt', 'longdesc', or in element content).	Supports	All non-text navigation and functional elements are accompanied by text descriptions. Additionally, when a user submits non-text content (e.g., respondent file upload), alternative text is provided.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Supports	If a survey designer user uploads a video or image to be contained in a survey, they enter alt text for it in the box provided via the interface. Otherwise there is no multimedia in the core app (n/a)
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supports	Visual line diffs are annotated with standard "+" and "-" notation to indicated additions and removals in addition to color on the dynamic row matrix question type only. All icons have symbols and alt text or text not reliant on colors, although colors are also implemented in addition to the alt text and

Criteria	Level of Support	Remarks and explanations
		text and tool tips to make it easier to navigate.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supports	SelectSurvey uses modern, text-based, semantic web development practices, and does not rely on non-HTML plugins or applets such as Java, ActiveX, or Flash.
(e) Redundant text links shall be provided for each active region of a server-side image map.	Supports	No server-side image maps are used. However, if a survey designer user adds an image map to a survey there is a box requiring them to enter alt text for each area in the map
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not applicable	No client-side image maps are used.
(g) Row and column headers shall be identified for data tables.	Supports	All row and column headers are text based.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Supports	Header rows are indicated in the markup.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Supports	No frames are used for navigation. An iframe might be used for the respondent

		file upload if a survey designer adds it to a survey it is labeled as such with text.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supports	
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Not applicable	Not a static website.
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Supports	
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with 1194.21(a) through (l).	Not applicable	None required.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using	Supports	

Criteria	Level of Support	Remarks and explanations
Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.		
(o) A method shall be provided that permits users to skip repetitive navigation links.	Supports	Left navigation is 100% text and in the same place unchanged throughout all application functions.
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Supports	If a survey designer sets a time limit on a survey, a text pop up will display allowing user to click for more time and/or if timed, will redirect them to a completion page with text.
